

DRIVEN BY POSSIBILITY™

Flotec

WHY GATES?

**MORE THAN 100 YEARS OF EXPERIENCE
IN INVENTING AND DEVELOPING**

**HIGH-QUALITY INNOVATIONS IN FLUID POWER
& POWER TRANSMISSION**

MEETING THE MOST DEMANDING STANDARDS

DRIVEN BY POSSIBILITY™

POWER TRANSMISSION: FROM CHAIN TO LIGHT-WEIGHT, ZERO-MAINTENANCE BELT

Since that first V-belt more than a century ago, our teams have been designing the best power transmission products in the world. Our light, safe and extremely durable belts allow you to swap downtime for uptime, get rid of maintenance and facilitate work.

PROFESSIONAL SUPPORT

Our engineers provide specialized support and have developed an online software platform to assist designers in quickly selecting optimum drive solutions. Gates Design Power™ helps with the engineering and specification of belt-drive systems for a wide range of applications. The platform is quick and easy to use, and makes the process more precise than ever.

THINK OUTSIDE THE BOX

Gates Thermoplastic Polyurethane (TPU) brings you special belts, tailor-made to fulfill your most challenging requirements. Our easy to clean, innovative belts allow for contact with food, reduce the environmental impact of packaging and help you to stay productive.

UNCHAIN YOUR OPERATIONS

Roller chains are outdated ... Why you must convert to Poly Chain® belt drives? They last 3x longer than chains, require no maintenance and provide more comfort for your employees.

FLUID POWER: LONG-LASTING HOSES FOR EXTREME CONDITIONS

Our integrated line of high-performance hydraulic hoses, couplings, fittings and assembly equipment can be used for various applications, from construction & manufacturing to agriculture or transport.

**LESS MAINTENANCE
& BREAKDOWNS**

**RELIABLE IN
TOUGH CONDITIONS**

**MOST INNOVATIVE
ON MARKET**

**SAFE & QUICK
INSTALLATION**

PROFESSIONAL GUIDANCE

In addition to high quality material, Gates engineers provide training sessions. Our products also come with a wide range of precision tools, crimp data, reference material and accessories.

MEGASYS™ MXG™: **RETHINK YOUR SPIRAL HYDRAULIC HOSES**

Using material science advancements, our engineers have designed a hydraulic hose that exceeds the performance of wire spiral constructions. MXG hoses guarantee minimal downtime (with enhanced ozone and abrasion resistance), they are easy to handle (30% lighter) and meet the highest standards.

SOLUTIONS THAT GIVE YOU ENDLESS POSSIBILITIES

In 1911, Charles C. Gates acquired a tire and rubber company in Denver. He soon revolutionized power transmission with the invention of the V-belt. More than one century later, Gates has grown into a global leader in power transmission and fluid products. But one thing has not changed, we remain dedicated to moving the world forward and creating new opportunities for our customers.

QUALITY

Every day, Gates strives to exceed your expectations. We are only satisfied when our products make your projects more profitable and help generate new business.

INNOVATION

Sustainability is at the forefront of everything we do. Our engineers push the boundaries of material science to develop innovative solutions tailored to the needs of your business and the planet.

EXPERTISE

Our people are passionate about your business. They understand your challenges and provide professional advice and services to add value to your applications.

DURABILITY

No need to worry about unnecessary downtime or maintenance, you can count on our products, even in extreme conditions.
